

## Can't find what you are looking for?

Welcome to the new online home of the National Panhellenic Conference. We designed a dynamic, fresh, contemporary site that makes it easier than ever to locate the information you are seeking. The changes include streamlined pages, a mobile-friendly design and a navigation that eliminates “dark corners” or “hidden pages” that frustrate anyone looking for information. Simply put, we placed you - the user - at the center of the website.

We're here to support you and provide easy access to what you need. A website is always evolving so we want to hear from you!

For site questions/suggestions, please email us at: [npccentral@npcwomen.org](mailto:npccentral@npcwomen.org).

### Guided Tour Webinars

Still have questions or want to know how to navigate the resources hosted here? Please join us for a website walk-through webinar. It's easy to sign up for one of four webinars scheduled in November and December.

Cori Wallace from OmegaFi, in partnership with a member of the NPC staff will host four guided tours for NPC volunteers, partners and friends who have questions about the location of materials, resources or information on the refreshed NPC website.

After registering, you will receive a confirmation email containing information about joining the webinar.

### Site Design

The site is mobile-optimized and dynamically designed. That means that the graphic elements “sink” into the background or disappear, while needed elements remain displayed to help you navigate the site with ease.

The font is Proxima Nova, with a larger typeface and clean, crisp look that works well on a light background and with various lengths of copy.

To make the site type/copy larger, please visit the following links to easily make your browser window resonate at enhanced sizes.

## Search Terms/Search Logic

Finding information is easier than ever with a simple internal search logic that provides options for what you are looking for, as well as a preview of each document and various site locations that match your search term(s). To find something within the website, please use the search tool, which looks like a magnifying glass. It is located in the far-right upper corner.

See one example here (we used “programs” as the search term):
